

Session Format

Session Times 10:00 am–11:30 am

- Things I wish someone had told me about this age/stage of development.
- Building a “family of support”.
- Parent/Child Activities
specific information about how the activity promotes brain development
- Concerns/Need to Know
- Plans for Home: Routines, Rituals, Respect and Brain Compatible Activities.

These workshops are brought to you FREE of charge, thanks to Great Start of Lapeer

Parenting Partnership

Strengthening Parents and
Children's Relationships

Bright From the Start

Monthly workshops to increase parent/child connections by strengthening your relationships.

Parents are children's first and most important teachers!
Increase your child's ability to be the best they can be.
Learn fun activities to help build strong and resilient children.

(810) 667-1544 or (810) 664-2073

www.parenting-partnership.com

Did you know?

- ♥ At birth only 17% of the brain is wired. The rest is developed through experiences.
- ♥ Babies can imitate right after birth.
- ♥ A feeling of safety is most important for the brain to learn.
- ♥ Infants younger than 6 months can detect that something is wrong.
- ♥ When the brain perceives empathy, the body begins to relax.
